

# Arthur TOUZARD

Senior Software Engineer

## Profile

As a Senior Software Engineer with extensive experience in the field, I have a proven track record of designing, developing, and delivering complex software solutions that meet the needs of businesses across a variety of industries. With a deep understanding of programming languages and software development methodologies, I am able to lead projects from conception to deployment, always striving for excellence in both the quality of the code and the user experience. Throughout my career, I have consistently demonstrated a commitment to innovation, collaboration, and continuous learning, and I am excited to bring my skills and expertise to the next challenge.

## Employment history

### Senior Product Engineer at Golem.ai, Paris

Feb 2020 – Present

After several years of research and development with the aim of simplifying work through artificial intelligence analysis of human language, we now offer Golem.ai. Our ambition is to offer companies pragmatic solutions to meet their key activities, and to ensure greater freedom of editing for developers who want to implement the technology by themselves. More broadly, it is about inviting natural language technologies in all digital environments, whatever their constraints, with reliability and serenity.

### IT Consultant at ANEO, Paris

Apr 2019 – Dev 2019

Aneo is a consulting agency founded in 2002, supporting companies in their organisational and digital transformations. Our know-how, our difference, comes from the fact that we are our own innovation laboratory. We are constantly renewing ourselves, and have adopted a flattened organisation for several years.
